In the C programming language, data types are declarations for memory locations or variables that determine the characteristics of the data that may be stored and the methods (operations) of processing that are permitted involving them.. The C language provides basic arithmetic types, such as integer and real number types, and syntax to build array and compound types.

- [Instructor] Welcome to this course on data structures and algorithms. In this course, we will learn about some of the commonly used algorithms and data structures. We will start by learning about how to analyze algorithms then move on to talking about arrays, which is an ingrained data structure in most of the programming languages. Then we will learn some simple sorting algorithms, like ...
