Vinegar is an aqueous solution of acetic acid and trace chemicals that may include flavorings. Vinegar typically contains 5–20% by volume acetic acid. Usually the acetic acid is produced by the fermentation of ethanol or sugars by acetic acid bacteria. Vinegar is now mainly used as a cooking ingredient, or in pickling. There are many types of vinegar, depending upon the source materials.

Scottish inventions and discoveries are objects, processes or techniques either partially or entirely invented, innovated or discovered by a person born in or descended from Scotland. In some cases, an invention's Scottishness is determined by the fact that it came into existence in Scotland (e.g., animal cloning), by non-Scots working in the country.
