Energy development is the field of activities focused on obtaining sources of energy from natural resources. These activities include production of conventional, alternative and renewable sources of energy, and for the recovery and reuse of energy that would otherwise be wasted. Energy conservation and efficiency measures reduce the demand for energy development, and can have benefits to ...

### **Energy development - Wikipedia**

Geologic modelling, Geological modelling or Geomodelling is the applied science of creating computerized representations of portions of the Earth's crust based on geophysical and geological observations made on and below the Earth surface. A Geomodel is the numerical equivalent of a three-dimensional geological map complemented by a description of physical quantities in the domain of interest.

Rating from 3 (very beneficial) to -3 (very harmful). A 0 indicates no impact or mixed impacts. Equity Impacts. Transport Model Improvements tend to better identify the full impacts of transportation decisions, including external impacts such as traffic congestion, parking costs, accident risks and pollution emissions, and so can help reduce these impacts.
