A spreadsheet is an interactive computer application for organization, analysis and storage of data in tabular form. Spreadsheets developed as computerized analogs of paper accounting worksheets. The program operates on data entered in cells of a table. Each cell may contain either numeric or text data, or the results of formulas that automatically calculate and display a value based on the ...

There is no formal process for creating the Personal macro workbook; when you record a macro and indicate that you want to store it in the Personal macro workbook, you are either creating it or adding a macro to it. After it's been created, it is always opened every time you open Excel. Macros stored here are always available.

This is a list of file formats used by computers, organized by type. Filename extensions are usually noted in parentheses if they differ from the file format name or abbreviation. Many operating systems do not limit

filenames to one extension shorter than 4 characters, as was common with some operating systems that supported the File Allocation Table (FAT) file system.

MirzaD, thanks for suggesting Okular. I have it installed in my ubuntu desktop, and never took it seriously .. until now. Thanks to you. Okular is awesome in the features it packs, and can certainly address the needs of the guy asking the question. With Okular, you use a Table Selection Tool and define an area, and then click in column borders to mark fields .. and then copy.
