Ecological economics (also called eco-economics, ecolonomy or bioeconomics of Georgescu-Roegen) is both a transdisciplinary and an interdisciplinary field of academic research addressing the interdependence and coevolution of human economies and natural ecosystems, both intertemporally and spatially. By treating the economy as a subsystem of Earth's larger ecosystem, and by emphasizing the ...

Ecological economics - Wikipedia

The environmental Kuznets curve is a hypothesized relationship between environmental quality and economic development: various indicators of environmental degradation tend to get worse as modern economic growth occurs until average income reaches a certain point over the course of development.

The Environmental Kuznets Curve

This document provides a framework for the future development of the existing body of Resolutions and Decisions. While it should provide guidance on how the goals and objectives are to be achieved, the Conference of the Parties, the Committees or the Secretariat as appropriate will take required action.

The programme of Collaborative Research in the Economics of Environment and Development (CREED) was established in 1993 as a joint initiative of the International Institute for Environment and Development

Poverty and Environmental Degradation: a Literature Review

The Environment Sector Research, Development and Evidence (R,D&E) framework was approved by MINMEC on 08 June 2012. This document addresses the need for a common framework for the collection of solid evidence that can be used in support of environment sector policy decisions and for the achievement of sector priorities.
