Invasive species, ecosystem services and valuation. Invasive alien species (IAS), defined as those non-native species that threaten ecosystems, habitats or species, are key drivers of human-caused global environmental change. Widely heralded as the second greatest agent of species endangerment and extinction after habitat destruction, particularly on islands, IAS are also inflicting serious ...

Intensive farming involves various types of agriculture with higher levels of input and output per cubic unit of agricultural land area. It is characterized by a low fallow ratio, higher use of inputs such as capital and labour, and higher crop yields per cubic unit land area. This contrasts with traditional agriculture, in which the inputs per unit land are lower.
