The human eye is an organ which reacts to light and pressure. As a sense organ, the mammalian eye allows vision. Human eyes help to provide a three dimensional, moving image, normally coloured in daylight. Rod and cone cells in the retina allow conscious light perception and vision including color differentiation and the perception of depth. The human eye can differentiate between about 10 ...

Making eye contact with an audience is one of the most terrifying things about presenting a speech in public. Because it's scary and difficult, several myths about eye contact exist to help us cope with our fears. These myths swirl around meeting rooms, conference halls, Toastmasters clubs, and classrooms, and if you listen closely, you might hear presenters whispering them to one another.
