Many species of fish are consumed as food in virtually all regions around the world. Fish has been an important source of protein and other nutrients for humans from time immemorial. In culinary and fishery contexts, fish may include shellfish, such as molluscs, crustaceans and echinoderms. English does not distinguish between fish as an animal and the food prepared from it, as it does with pig ...

BEEF HEART:.. Although still fed to fish and often part of many homemade fish food recipes due to popular YouTube channels and other social media, Beef Heart is a food source that should be used very sparingly if at all. Although many carnivorous fish enjoy it and it may be a good way to kick start growth in juvenile fish, excessive long term use can add stress to the fish' digestive tract and ...
