Modeling with Excel+OML, a practical guide

In graph theory, a minimum cut of a graph is a cut (a partition of the vertices of a graph into two disjoint subsets that are joined by at least one edge) that is minimal in some sense. Variations of the minimum cut include: The cut with the minimum number of edges among all cuts in an undirected graph, determining the edge connectivity of the graph. ...

Minimum cut - Wikipedia

In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives. In the simplest case, an optimization problem consists of maximizing or minimizing a real function by systematically choosing input values ...
