Picture frames have traditionally been made of wood, which is still the most common material, although other materials are used including silver, bronze, aluminum, and plastics such as polystyrene.A picture frame may be of any color or texture, but gilding is common, especially on older wooden frames. Some picture frames have elaborate molding which may relate to the subject matter.

These timber frame plans are drawn by professional timber framers and are made for someone who wants to build their own timber frame. Following the same plan style used in the work shop of Gibson Timber Frames, there are elevations of the timber frame and individual piece drawings of all the parts in the timber frame.

Most forms of steel framing used in UK construction may be grouped as follows: Braced frames or 'simple' construction, in which the beams and columns are designed to resist vertical loads only. The connections are designed as nominally pinned.; Rigid or continuous frames, in which the framed structure is designed so that the connections between the members are moment-resisting.
