

fundamentals of geographic information pdf

BASIC CONCEPT OF GIS 1/5 What does GIS stand for? Geographic Information Science is the science concerned with the systematic and automatic processing of spatial data and information with the help of computers is the theory behind how to solve spatial problems with computers Geographic Information System is a system designed for storing, analyzing,

Fundamentals of Geographic Information System

A geographic information system (GIS) is a system designed to capture, store, manipulate, analyze, manage, and present spatial or geographic data. GIS applications are tools that allow users to create interactive queries (user-created searches), analyze spatial information, edit data in maps, and present the results of all these operations.
